Freedom of Information Act and Privacy Act Requests, Appeals, and Consultations Received
During the Period of April 25 – April 29, as submitted by requester

Tracking Number	Requester's Name	Requester's Organization	Request Description	Received Date
2022-000152	Carlos Sisco		Requester is seeking copy of NRC Yellow Announcement YA-21-0083. YA-21-0083 is cited on the NRC's webpage under Required Reporting for Clearance Holders https://www.nrc.gov/security/required-reporting-for-clearance-holders.html . The following Yellow Announcements associated with Reporting for Clearance Holders are in the public ADAMS: 1. YA-18-0025, "Changes to Management Directive 12.3, Foreign Travel Reporting" (ML18025B102) 2. YA-18-0056, "Updates to NRC Personnel Security Reporting Requirements" (ML18158A447) 3. YA-18-0062, "Revised: Updates to NRC Personnel Security Reporting Requirements" (ML18186A658) I believe YA-21-0083 could be an update to YA-18-0062. I note that there are 67 Yellow Announcements in the public ADAMS. I would appreciate your prompt response within ten working days of the receipt of this request, as provided by the Code and the NRC's policies. I agree to pay such fees as required under 10 C.F.R. 9.33, et seq. without further authorization; however, please call if the fees, and copying costs exceed \$25.00. I prefer that the document be produced in electronic form.	04/25/22

Office of Nuclear Reactor Regulation (NRR) Staff Present at Pressurized Water Reactor (PWR) Owners Group Risk Management Committee Meeting

On April 27, 2022, NRR staff presented at the PWR Owners Group (PWROG) Risk Management Committee meeting ([ML22119A116](#)). The staff presented several topics to communicate the various areas where staff are leveraging risk informed decision making, including several topics related to the risk-informed process for evaluations (RIPE), such as approving an exemption under the RIPE and the lessons-learned efforts that are underway, and plans for expanding RIPE to include technical specifications. The staff also provided an update on their assessment of Aluminum High Energy Arcing Fault using LIC-504, Integrated Risk-Informed Decision-making Process for Emergent Issues; Technical Specification Task Force (TSTF)-505 Risk Informed Technical Specifications Initiative Lessons Learned; efforts underway in Risk-Informing Evaluations of Common Cause Failures in Digital Instrumentation and Control Systems; and areas for consideration in future updates to Regulatory Guide 1.200, "Acceptability of Probabilistic Risk Assessment Results for Risk-Informed Activities." The meeting was well attended and was successful in coordinating future risk-informed activities, as well as sharing industry insights.

ENCLOSURE C

Office of Nuclear Material Safety and Safeguards (NMSS)
Items of Interest
Week Ending April 29, 2022

NMSS Staff Issued a License Amendment to Duane Arnold Energy Center (DAEC)

On April 25, 2022, the staff issued an amendment to implement a revision to the DAEC Emergency Plan ([ML22066A763](#)). The revised plan reflects the requirements associated with emergency preparedness necessary for the independent spent fuel storage installation (ISFSI)-only configuration, consistent with the permanent removal of all spent fuel from the DAEC spent fuel pool, which was completed on April 10. The ISFSI-Only Emergency Plan was the final action needed to fully align the DAEC licensing basis to the ISFSI-only phase of the decommissioning process.

NMSS Staff Held a Pre-Application Meeting with Niowave, Inc

On April 27, 2022, NMSS staff held a virtual pre-application meeting with representatives from Niowave, Inc. to discuss their plans for submitting a Part 70 license application for a Molybdenum-99 (Mo-99) medical isotope facility in Lansing, MI. The facility would produce about 5 percent of the domestic Mo-99 demand. During the meeting, representatives from Niowave described their medical isotope production activities authorized under two separate licenses issued by NRC Region III and planned commercial Mo-99 production facility. Additional pre-application meetings are planned on focused topics of review during the next several months. A portion of the meeting was closed to the public to give the NRC staff an opportunity to discuss security-related and proprietary information.

Use of Electronic Signatures by Medical Licensees on Internal Documents: Draft Regulatory Issue Summary; Discontinuation; 10 CFR Chapter I (NRC-2018-0185)

On April 29, 2022, the NRC published a notice in the *Federal Register* ([87 FR 09172](#)) discontinuing the publication of draft regulatory issue summary (RIS), "Use of Electronic Signatures by Medical Licensees on Internal Documents," because the guidance no longer provides useful information as the contents are now considered standard practice. The effective date for discontinuation of the draft RIS is April 29, 2022.

Decommissioning Financial Assurance for Sealed and Unsealed Radiographic Materials: Regulatory Basis; Request for Comment; 10 CFR Parts 30 and 70 [NRC-2017-0031; RiN 3150-AK52]

On April 28, 2022, the NRC published a notice in the *Federal Register* ([87 FR 09099](#)) requesting comment on a regulatory basis to support a rulemaking that would amend its regulations for decommissioning financial assurance for sealed and unsealed radioactive materials. The rulemaking would revise NRC's decommissioning funding requirements for radioactive material based on the relative risk to public health and safety from different radioisotopes, including naturally occurring and accelerator-produced radioactive material. The potentially affected licensees are those authorized to possess byproduct and special nuclear material. Comments are requested by June 27, 2022.
