Duane Arnold Energy Center
Docket No. 50-331
Renewed Op. License No. DPR-49

Regulatory Issue Summary 2000-11, NRC Emergency Telecommunications System,
Statement of Intent to Implement the Proposed Voluntary Initiative

The referenced Regulatory Issue Summary addressed voluntary alternatives in providing long distance access for Emergency Telecommunications System (ETS) functions. NextEra Energy Duane Arnold (NEDA) has transitioned to a Voice over Internet Protocol (VoIP) system for the Duane Arnold Energy Center (DAEC) as part of the decommissioning process. The VoIP system meets the requirement of providing long distance access independent of the local telephone switch and will be used for ETS functions at DAEC. The NRC Headquarters Operations Officers have been notified of the change.

If you have any questions, please contact Tracy Weaver at 319-851-7250.

A handwritten signature in blue ink that reads "Paul Hansen".
