Good afternoon Larry,

The U.S. Nuclear Regulatory Commission (NRC) is preparing to issue a license amendment for Beaver Valley Power Station, Unit 2. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of this amendment.

Please reply if the State of Pennsylvania has comments on the following requested licensing action submitted to the NRC by Energy Harbor Nuclear Corp. (the licensee), "License Amendment Request to Correct TS 3.1.7 Change Made by TSTF-547," by letter dated September 15, 2021 (Agencywide Document and Access Management System (ADAMS) Accession Nos. ML21259A090). The proposed changes to technical specification 3.1.7.2, "Unit 2 Rod Position Indication," would remove a required action that currently has a logic error and renumber another required action.

The proposed no significant hazards consideration for this amendment request was published in the Federal Register on January 25, 2022 (87 FR 3847).

Please respond with comments, if any, by May 25, 2022.

Thank you,
Brent
