Office of Nuclear Reactor Regulation (NRR) Staff Issue Bulletin 2012-01, “Design Vulnerability in Electric Power System,” Closeout Letter to Diablo Canyon Power Plant, Units 1 and 2

On April 29, 2022, the U.S. Nuclear Regulatory Commission (NRC) staff issued a closeout letter (Agencywide Document Access Management System (ADAMS) Accession No. [ML22108A286](#)) for Bulletin 2012-01, “Design Vulnerability in Electric Power System,” (ADAMS Accession No. [ML12074A115](#)) for Diablo Canyon Nuclear Power Plant, Units 1 and 2 (Diablo Canyon). The staff has reviewed the information submitted by Pacific Gas and Electric Company (the licensee) and verified that the licensee provided the necessary information requested for Diablo Canyon in reaching the closeout conclusion.

Florida Power and Light Submitted a Defense-In-Depth and Diversity Evaluation for Turkey Point Units 3 and 4 Digital Instrumentation and Controls Modernization

On May 3, 2022, Florida Power and Light submitted a defense-in-depth and diversity evaluation (ADAMS Accession No. [ML22123A231](#)) for the planned digital instrumentation and controls modernization at the Turkey Point Units 3 and 4 for NRC staff review. The evaluation will be part of the planned Turkey Point license amendment request that the licensee plans to submit to the NRC in the second quarter of 2022.

NRR Staff Brief West Virginia Delegate on NRC Licensing and Inspection of Non-Power Reactors

On May 4, 2022, staff from NRR provided a virtual presentation to West Virginia Delegate Brandon Steele and state legislative staffers on NRC licensing and inspection of non-power reactors. The attendees sought an overview of the NRC’s non-power reactor programs, in consideration of possible plans for construction of a non-power reactor at West Virginia University. Attendees indicated that there will likely be a follow-up request for NRC staff to provide a similar presentation, also including an overview of the NRC’s agreement state program, at a future meeting of the West Virginia House and Senate Energy Committees.

Regulatory Improvements for Production and Utilization Facilities Transitioning to Decommissioning: Proposed Rule; Correction; Title 10 of the Code of Federal Regulations (10 CFR) Parts 20, 26, 50, 51, 52, 72, 73 and 140 [NRC-2015-0070; RIN 3150-AJ59]

On May 6, 2022, the NRC published a notice in the *Federal Register* ([87 FR 27025](#)) correcting a proposed rule that was published in the *Federal Register* on March 3, 2022 ([87 FR 12254](#)). The proposed rule would amend the NRC's regulations that relate to the decommissioning of production and utilization facilities to maintain a safe, effective, and efficient decommissioning process; reduce the need for license amendment requests and exemptions from existing regulations; address other decommissioning issues deemed relevant by the NRC; and support the NRC's Principles of Good Regulation. This action is necessary to correct a reference. The correction takes effect on May 6, 2022.

NMSS Staff Participated in Extended Storage Meeting

On May 2, 2022, NMSS staff attended and presented at the spring 2022 Electric Power Research Institute Extended Storage Collaboration Program meeting in Las Vegas, Nevada. Staff presented on NRC activities related to Spent Fuel Storage and Transportation. Representatives from Department of Energy, industry, National Laboratories, and the International Atomic Energy Agency presented on a number of topics relevant to the status of research activities on US domestic spent fuel management. Topics included mitigation and repair, high burnup fuel rod testing, cask drop testing, seismic testing, and instrumented storage cask measurement.

NMSS Staff Completed the Review of the Indian Point Energy Center's Post Shutdown Decommissioning Report

On May 2, 2022, the NRC staff issued a letter to Holtec Decommissioning International acknowledging the completion of the staff's review of the Indian Point Energy Center (IPEC) Post Shutdown Decommissioning Report (PSDAR). The staff's review concludes that the PSDAR contains the information required by 10 CFR 50.82(a)(4)(i). The letter also contains a summary of the public's comments obtained from the PSDAR public meeting NRC held near IPEC on July 29, 2021.

NMSS Staff Held a Public Meeting on the Decommissioning Proposed Rule

On May 4, 2022, the staff held a hybrid public meeting on the decommissioning proposed rulemaking in San Luis Obispo, California. There were 31 members of the public in attendance with 10 attending in person and 21 attending via Microsoft Teams. Attendees included 5 individuals from state or local government, 5 individuals affiliated with the nuclear industry, 3 from a non-governmental organization, 2 congressional staffers, 1 individual from another

Federal agency, 1 member of the media, and 14 others with unknown affiliation. The staff discussed the proposed rule to facilitate submissions of public comments. All participant questions were addressed at the meeting. The staff is planning to hold one more hybrid meeting on May 9, 2022, in Plymouth, Massachusetts. The public comment period on the proposed rule is being extended to August 30, 2022.
