

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

May 18, 2022

Michael G. Wiese  
Radiation Safety Officer  
Universal Medical Resources, Inc.  
207 Lange Dr.  
Washington, MO 63090

Dear Mr. Wiese:

Enclosed is Amendment No. 12 renewing your NRC Material License No. 24-32189-01 in accordance with your request.

Your license has been renewed for a fifteen year term and will not expire until May 31, 2037.

This also refers to the telephone discussion on May 12, 2022, between you and me concerning the completion of elements of your radiation safety program for servicing clients at temporary job sites. We discussed NUREG 1556 Vol. 18, Rev.1, as it applies to your licensed program.

Since some of the necessary commitments were made in your application dated November 9, 2021, in support of Amendment No. 11, and since you committed to submitting the remaining commitments, statements, representations and clarifying information based on the NUREG 1556 Vol. 18, Rev.1 within 45 days of the date of this letter, we issued your license renewal at this time.

Within 45 calendar days of the date of this letter (by close of business on July 5, 2022) please provide only one response to complete the items in Appendix B in the NUREG. Please only send us one complete, written, currently dated and legibly, physically or digitally signed correspondence document, such as either an NRC Form 313 or a business-style letter containing the same information as an NRC Form 313. You may co-sign this document but it should be signed by a senior management representative primarily.

Please ensure that the requested information is answered completely and accurately.

Please do not send multiple copies of responses and please do not submit any information that is identical to what you have already sent us unless we direct you to do so. If you resubmit such information for the sake of adding context and other details to enhance its meaning, that is acceptable.

Please do not email a PDF document to me, and transmit a faxed version, and/or a hard copy sent by mail. Only one copy transmitted in only one of these ways is appropriate to prevent administrative processing errors, although emailing a PDF document to me at [colleen.casey@nrc.gov](mailto:colleen.casey@nrc.gov) and [R3DNMSMAIL.Resource@nrc.gov](mailto:R3DNMSMAIL.Resource@nrc.gov) is the most efficient mechanism for responding to me (one email to both recipients simultaneously).

Please address your written response to my attention as “additional information to control number 618192” to facilitate proper handling.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9807 so that we can provide appropriate corrections and answers.

In accordance with 10 CFR 2.390 of the NRC’s “Rules of Practice,” a copy of this letter and its enclosures will be available electronically for public inspection in the NRC Public Document Room or from the NRC’s Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC’s Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency’s *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC’s safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Colleen Carol Casey  
Materials Licensing Branch
