

Facility: Duane Arnold Energy Center Date of Exam: April 8, 2019 Scenario Numbers: 1/ 2 /3 Operating Test No.19-1:		Initials		
QUALITATIVE ATTRIBUTES		a	b*	c*
1.	The initial conditions are realistic in that some equipment and/or instrumentation may be out of service, but it does not cue the operators into expected events.	Ⓟ	Jam	CDJ
2.	The scenarios consist mostly of related events.	Ⓟ	Jam	CDJ
3.	Each event description consists of the following: <ul style="list-style-type: none"> the point in the scenario when it is to be initiated the malfunction(s) or conditions that are entered to initiate the event the symptoms/cues that will be visible to the crew the expected operator actions (by shift position) the event termination point (if applicable) 	Ⓟ	Jam	CDJ
4.	The events are valid with regard to physics and thermodynamics.	Ⓟ	Jam	CDJ
5.	Sequencing and timing of events is reasonable and allows the examination team to obtain complete evaluation results commensurate with the scenario objectives.	Ⓟ	Jam	CDJ
6.	If time compression techniques are used, the scenario summary clearly so indicates. Operators have sufficient time to carry out expected activities without undue time constraints. Cues are given.	Ⓟ	Jam	CDJ
7.	The simulator modeling is not altered.	Ⓟ	Jam	CDJ
8.	The scenarios have been validated. Pursuant to 10 CFR 55.46(d), any open simulator performance deficiencies or deviations from the referenced plant have been evaluated to ensure that functional fidelity is maintained while running the planned scenarios.	Ⓟ	Jam	CDJ
9.	Scenarios are new or significantly modified in accordance with Section D.5 of ES-301.	Ⓟ	Jam	CDJ
10.	All individual operator competencies can be evaluated, as verified using Form ES-301-6 (submit the form along with the simulator scenarios).	Ⓟ	Jam	CDJ
11.	The scenario set provides the opportunity for each applicant to be evaluated in each of the applicable rating factors. (Competency rating factors as described on Forms ES-303-1 and ES-303-3.)	Ⓟ	Jam	CDJ
12.	Each applicant will be significantly involved in the minimum number of transients and events specified on Form ES-301-5 (submit the form with the simulator scenarios).	Ⓟ	Jam	CDJ
13.	Applicants are evaluated on a similar number of preidentified critical tasks across scenarios, when possible.	Ⓟ	Jam	CDJ
14.	The level of difficulty is appropriate to support licensing decisions for each crew position.	Ⓟ	Jam	CDJ
	Target Quantitative Attributes per Scenario (See Section D.5.d)	Actual Attributes		
1.	Malfunctions after EOP entry (1-2)	2	2	2
2.	Abnormal events (2-4)	4	2	4
3.	Major transients (1-2)	3	2	4
4.	EOPs entered/requiring substantive actions (1-2)	2	2	2
5.	Entry into a contingency EOP with substantive actions (≥ 1 per scenario set)	2	2	1
6.	Preidentified critical tasks (≥ 2)	5	3	3
* The facility licensee signature is not applicable for NRC-developed tests. # An independent NRC reviewer initials items in column "c"; chief examiner concurrence is required.
