NUMBER 70-1151**

Dear Mr. Annacone:

This letter refers to our in-person meeting on May 18, 2022, during which we discussed the Nuclear Regulatory Commission's (NRC's) evaluation of your performance in the four major areas of safety operations, radiological controls, facility support, and safeguards (details not discussed with the public) during calendar years 2020 - 2021. The meeting was beneficial and provided the NRC the opportunity to discuss your facility's performance during the last assessment period. The meeting also afforded you the opportunity to provide feedback to the NRC regarding your perception of the NRC performance review.

The meeting also afforded members of the public the opportunity to ask questions and provide feedback to the NRC regarding our inspection program for the Columbia Fuel Fabrication Facility. The list of meeting attendees is enclosed. The meeting slide presentation is available under accession number ML22122A111 in ADAMS.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).

ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).
