

[Home](#)Bio - Matt Gibson

Matt Gibson

Matt Gibson is a Technical Executive at the Electric Power Research Institute (EPRI), with over 40 years of experience in Operational Technology/Digital I&C systems design and management. Matt is a licensed Control Systems Engineer and certified cyber security professional who joined EPRI in 2013 after a long career with Progress Energy , now Duke Energy, where he had various roles in the design, implementation, and support of Digital I&C systems throughout the Duke Fleet, including an 11 year stint as the Fleet Digital Architect. Matt's research focus areas at EPRI are Systems Engineering, digital I&C, hazards analysis, human factors engineering, and cyber security. Matt is currently leading the Integrated Digital Systems Engineering portfolio at EPRI which seeks to integrate and modernize the digital engineering processes and methods used in the nuclear power industry.
