

[Home](#)Bio - Stacy Prasad

Stacy Prasad

Stacy was technically trained as a computer and electrical engineer at Drexel University before beginning her career at the NRC in 2003. She has worked in the regional office supporting the resident inspector program and regional inspections before moving to the HQ office to support electrical inspections for vendors supplying components to operating reactors, aircraft impact inspections, implementation of the NRC's enforcement program and policy, and now works as a security risk analyst in the Office of Nuclear Security and Incident Response where she became one of the ambassadors for the beRISK Smart initiative.
