

# Lauren Gibson

Ms. Lauren K. Gibson is the Chief for the License Renewal Projects Branch. Previously, she served as a project manager for flood hazard reevaluations as part of the post-Fukushima lessons-learned division; a communications project manager for that division; as an acting branch chief for Federal, State, and Tribal Liaison branch; and as qualified licensing project manager in the Division of Operating Reactor Licensing. She has also worked as a Reactor Systems Engineer and a Management Analyst. Ms. Gibson joined the NRC in 2007 as a participant in the entry-level Nuclear Safety Professional Development Program. Ms. Gibson has a B.A. in Physics and Political Science (dual degree) from Gettysburg College and an M.A. in International Science and Technology Policy (focus: Energy Policy) from the Elliott School of International Affairs at the George Washington University.
