

Rod McCullum

Rod McCullum has been working on regulatory issues at NEI since 1998. He has 35 years of nuclear engineering, licensing, management and regulatory policy experience. Currently, at NEI, he leads industry efforts to reduce business risks associated with used nuclear fuel management, commercial nuclear power plant decommissioning, and emergent material degradation issues by directing broad scope technical and regulatory programs. He held prior positions in Government (with the Department of Energy) and Industry (at three commercial nuclear power plants). He has a Bachelor of Science degree in Nuclear Engineering (University of Cincinnati, 1985) and a Master of Business Administration degree (Lewis University, 2000).
