Good afternoon Larry,

The U.S. Nuclear Regulatory Commission (NRC) is preparing to issue a license amendment for Beaver Valley Power Station, Units 1 & 2. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of this amendment.

Please reply if the State of Pennsylvania has comments on the following requested licensing action submitted to the NRC by Energy Harbor Nuclear Corp. (the licensee), "License Amendment Request to Revise Technical Specification 3.3.5, 'Loss of Power (LOP) Diesel Generator (DG) Start and Bus Separation Instrumentation'," by letter dated August 29, 2021 (Agencywide Document and Access Management System (ADAMS) Accession No. ML21242A125), as supplemented by letter dated April 4, 2022

(ML22094A115). The proposed changes to technical specification 3.3.5 would add notes to required actions C.1 and D.1, and revise Table 3.3.5-1, "Loss of Power Diesel Generator Start and Bus Separation Instrumentation."

The proposed no significant hazards consideration for this amendment request was published in the Federal Register on January 25, 2022 (87 FR 3847).

Please respond with comments, if any, by June 16, 2022.

Thank you,  
Brent
