NRC to Hold Virtual Vendor Oversight Workshop

The U.S. Nuclear Regulatory Commission will host its 8th [Workshop on Vendor Oversight](#) via Microsoft Teams on June 1-2.

The workshop will be open to the public and will run each day from 10 a.m. to 1 p.m., Eastern time. Interested participants must register using the link on the workshop [webpage](#), which also includes the meeting's agenda.

The workshop brings together a variety of stakeholders, including the public, licensees, applicants, industry organizations, and vendors of safety-related parts, materials, and services. Workshop sessions topics include: counterfeit, fraudulent, and suspect items; licensee, applicant, and supplier assessment of laboratories owned by the U.S. Department of Energy; lessons learned while inspecting during a pandemic; and implementing the Electric Power Research Institute's guidance on hybrid and remote assessments. Additionally, the NRC staff will hold an "Ask the Regulator" session each day to allow for additional discussions.

For more information, contact Toni Sakadales via e-mail at NRC_vendor_workshop.Resource@nrc.gov or via phone at (301) 415-6441.
