June 9, 2022

Ms. Tea T. Shi, M.S.
Radiation Safety Officer
Portneuf Medical Center
777 Hospital Way
Pocatello, ID 83201

SUBJECT: LICENSE NOTIFICATION

Ms. Shi:

By letter dated June 1, 2022, you requested to add an additional use under 10 CFR 35.300 for three of your authorized users (Dr. Michael Callaghan, Dr. Steven Todd, and Dr. Calvin McAlister). You also requested the use of two additional types of byproduct material for PET imaging under 10 CFR 35.200. In a telephone conversation on June 9, 2022, you confirmed that the additional use under 10 CFR 35.300 is intended to be an outpatient procedure. Please note that the license does not require an amendment because these are uses already permitted under your license. In addition, the Authorized Users previously mentioned are already authorized on the license for material use under 35.300. Please be mindful that any procedures affected by these new materials and uses (i.e., use of unsealed materials, waste procedures, release criteria, etc.) may need to be updated accordingly. These procedures will be inspected as part of the Nuclear Regulatory Commission (NRC) inspection program.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

Lizette Roldán-Otero, PhD, Chief
Materials Inspection Branch
