Subj: Transfer material to license 21-35144-02 and terminate license 21-35145-01

Dear Colleagues,

We request to transfer all licensed material from license 21-35145-01 to license 21-35144-02 and terminate license 21-35145-01.

The material listed on 21-35145-01 is:

Material	Form	Max Amount	Authorized Use
Depleted Uranium	Solid	3 Ci	R & D. Fabrication of source material for manufacturing shielding and accelerator parts. Distribution of shielding and manufactured accelerator parts to authorized persons.

We currently have 455 kg (0.26 Ci) of depleted uranium. The facility, security, shielding, and handling equipment for the new license (-02) is the same as under the existing license (-01). The RSO and AU are also the same. Therefore, no changes are needed to transfer the material and immediately terminate license 21-35145-01. This should also void invoice number 22-3376 on docket 04038369 for \$8,500 to renew that license.

Thank you for your guidance and oversight throughout the amendment process.

Sincerely,

Michael Zamara  
President and CFO
