Subject: U.S. NRC Materials License No. 21-02335-06
Date: Friday, May 27, 2022 2:52:00 PM

Ms. Lucier:

Good morning. I have reviewed your amendment request dated April 14, 2022, in which you requested the following changes to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-02335-06:

- appoint you as the Radiation Safety Officer;

The accompanying Appendix B, "Suggested Format for Providing Information Requested in Items 5 through 11 of U.S. NRC Form 313," included some apparent typographical or inadvertent selections as described below:

- items 5 and 6 describe Cs-137 sealed sources for use in various Nuclear Chicago and Texas Nuclear fixed gauging devices. Though, the column selected is "No," as opposed to the expected selection of "Yes." Please select "Yes," to identify that you are requesting continuing licensed authorization for the devices described. Also, note that a selection is also needed concerning the applicability of financial assurance;
- Item 10.7, "Radiation Safety Program – Leak Tests," identifies that you may like to perform Leak Test Analysis under this license; however, you note that analysis will typically be performed under U.S. NRC License No. NPF-43. If you would like the authority to perform Leak Test Analysis under this license, separate from the authorization provided in NPF-43, please provide applicable descriptions of your equipment, procedures and personnel qualification for performing Leak Test Analysis in-house. You may also identify that Leak Test Analysis will be performed under U.S. NRC License No. NPF-43 or other persons specifically licensed by the U.S. NRC or an Agreement State; and
- a selection regarding the performance of Non-Routine Maintenance Operation in Item 10.8, "Radiation Safety Program – Maintenance," is not made. Please make a selection in the row concerning the performance of Non-Routine Operations and Maintenance. If you'd like to continue to perform Non-Routine Operations and Maintenance as presently authorized in Condition 17.A., you may indicate this by identifying that the information listed in Appendix J of NUREG-1556, Vol. 4, Rev. 1. Alternatively, you may make a selection indicating that these services will be contracted out to the manufacturer, distributor or person authorized by the NRC or an Agreement State.

Please resubmit the applicable pages of your submission with a correction to the described typographical or inadvertent selections. In addition, please clarify the request regarding Leak Test Analysis and provide supplemental information as needed.

Please respond within 15 days. Include a signed cover letter with your response describing the application changes and provide the corrected pages as attachments to your request. For routing purposes, please reference U.S. NRC Materials License No. 21-02335-06, Docket No. 030-04804 and

Control No. 630731. You may submit the response to me directly via e-mail if it is convenient to do so. Though, please verify that the response was received.
