| 2. | IP 82002.08 | 09/17/18 |
| 3. | IP 43006 | 10/16/20 |

TRANSMITTED:

| | <u>Number</u> | <u>Date</u> |
|--|-----------------|-------------|
| | IMC 1245 App C2 | 06/16/22 |
| | IP 43006 | 06/16/22 |

TRAINING: No special training is required for any documents issued with this Change Notice.

REMARKS: IMC 1245 App C2, "Reactor Engineering Inspector Technical Proficiency Training and Qualification Journal." This change updated expired websites, added the new names of NRC offices, and updated the qualification card signoff sheet to include the need to update TMS with inspector qualification status. This change also removed a sentence in the introduction section of the document that stated Appendix A had to be completed before commencement of this ISA, since this sentence appeared to conflict with an earlier statement in the document that said such performance could be acceptable.
A note was added to ISA-4 to indicate that not all of the references may be applicable to a licensee.
A number of adjustments were made to several ISAs and OJTs to clarify and help focus learning objectives.

IP 82002.08, "Inspection of Site Specific Implementation of 10 CFR 50.54(hh)(2) Mitigating Strategies for Nuclear Power Plants Referencing the AP1000 Certified Design" (ML18229A264). Staff determined that the objectives of this inspection could be accomplished via IP 71111.05, "Fire Protection."

IP 43006, "Inspection of the Implementation of Mitigation Strategies Order Regulating the Use of National SAFER Response Centers." Updated to include 10 CFR 50.155 guidance and lessons learned from the inspection (ML20329A183 at Phoenix Safer Facility). Update corrective action to include review of operational experience from phase 2 equipment issues and failures.
