Subject: request for termination of the NRC license

Mr. Rivera,

The information provided with the request to terminate the license indicated the disposal only of the Cesium gauges. According to our inspection records, you also possess two SODERN gauges containing tritium. Please let us know the current status of these gauges. If these gauges were disposed of or transferred to another licensee, please provide us with documentation of the disposal or transfer.

Information may be provided by a pdf copy of a document signed by a management representative, and may be emailed directly to me.

Thank you,

Betsy Ullrich, Senior Health Physicist
