

**UNITED STATES  
NUCLEAR REGULATORY COMMISSION**  
WASHINGTON, D.C. 20555-0001

**SAFETY EVALUATION REPORT  
Docket No. 71-9358  
Model No. TN-LC Package  
Certificate of Compliance No. 9358  
Revision No. 7**

**SUMMARY**

On May 20, 2022, the staff issued Certificate of Compliance (CoC) No. 9358, Revision No. 6, for the Model No. TN-LC package. Two typographical errors were subsequently noted in the CoC and are corrected in Revision No. 7 of CoC No. 9358.

These changes do not affect the ability of the package to meet the requirements of Title 10 of the *Code of Federal Regulations* (10 CFR) Section 71.

**EVALUATION**

Licensing drawing "65200-71-21" was incorrectly identified as "Drawing 5200-71-21" in the CoC

Condition No. 5(c) should have included Condition No. 5(b)(2)(v) in addition to Condition No. 5(b)(2)(iv) for both the PWR fuel assemblies and the fuel rods in a 21 pin can which are described in Condition No. 5(b)(1)(iv).

**CONDITIONS**

The following changes were made to the Conditions of the certificate:

Condition No. 5(a)(3) was modified to correctly identify licensing drawing 65200-71-21 for the TN-LC transport packaging configuration.

Condition No. 5(c) was modified to add the limitations of Condition No. 5(b)(2)(v) to those of Condition No. 5(b)(2)(iv) for both the PWR fuel assemblies and fuel rods in a 21 pin can described in Condition No. 5(b)(1)(iv).

Condition No. 11 authorizes the previous revision of the certificate for approximately one year.

The expiration date of the certificate is not changed.

**CONCLUSION**

Based on the statements and representations in the application, the staff finds that these changes do not affect the ability of the package to meet the requirements of 10 CFR Part 71.

Issued with CoC No. 9358, Revision No. 7.
