Subject: U.S. NRC Requests for Additional Information Regarding Framatome Topical Report, ANP-10311P-A, Revision 1, Supplement 1P, Revision 0, "COBRA-FLX: ORFEO-HMP Critical Heat Flux Correlation" – EPID L-2021-TOP-0040

Mr. Gary Peters, Director
Licensing and Regulatory Affairs
Framatome, Inc.
3315 Old Forest Road
Lynchburg, VA 24501

Mr. Peters,

This e-mail serves as a cover letter for the transmittal of Requests for Additional Information (RAIs).

By letter dated December 16, 2021 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML21356A051), Framatome Inc. (Framatome) submitted for U.S. Nuclear Regulatory Commission (NRC) staff review and approval Topical Report (TR) ANP-10311P-A, Revision 1, Supplement 1P, Revision 0, "COBRA-FLX: ORFEO-HMP Critical Heat Flux Correlation" (ADAMS Package Accession No. ML21356A056).

With respect to the review of ANP-10311P-A, Revision 1, Supplement 1P, Revision 0, I have placed an electronic version of the RAIs in the BOX.com folder for your review. Gayle Elliott, Framatome, has been given access to the folder. The RAIs have also been placed in ADAMS as non-public so it can be declared an Official Agency Record in the future. When responding to this RAI, please confirm if there is any proprietary information in the RAI and/or the response. Your response, provided via letter under authorized signature, will generate the ADAMS version of the RAIs based on the proprietary nature of the document. Our current schedule for this TR review assumes that Framatome will provide responses to the RAIs by August 30, 2022.

If you have any questions or would like to discuss the RAIs with staff to ensure you understand the NRC's request, please let me know.

This e-mail will be uploaded in ADAMS and declared publicly available.

Ngola Otto
Project Manager, Licensing Projects Branch
Division of Operating Reactor Licensing
Office of Nuclear Reactor Regulation
US Nuclear Regulatory Commission
