Dear Mr. Dixon:

We have reviewed the license amendment request dated April 26, 2022, for Acuren Inspection, Inc., NRC License No. 22-27593-01. Based on the review, we will need the following.

The NRC regulations in Title 10 of the *Code of Federal Regulations* (10 CFR) 34.42, "Radiation Safety Officer for industrial radiography", requires the radiography licensee to have a qualified Radiation Safety Officer (RSO). The licensee will appoint and delegate the duties and responsibilities to manage its radiation safety program to the RSO in writing. NUREG-1556, Volume 2, Revision 1, Appendix O, "Model Delegation of Authority,"

provides an example of how to document a person accepting the responsibility of becoming an RSO (see attached sample).

Please provides a copy of the memo of the delegation of authority for the RSO signed by the licensee and the proposed RSO.

To continue the review of your application, we request that you submit your response under a dated and signed cover letter within 30 days. In the cover letter, please refer the license number, docket number and Mail Control No. 630846. If you have questions, require additional time to respond, or require clarification on any of the information stated above, please contact me at 630-829-9623 or reply to this email.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this correspondence will be made available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Best regards,

Frank Tran

Delegation of Authority to RSO

Memo To: Chris Dixon
From: Talman Pizzey, President
Subject: Delegation of Authority

Chris Dixon, you have been appointed radiation safety officer and are responsible for ensuring the safe and secure use of radiation. You are responsible for managing the Radiation Protection Program, identifying radiation protection problems, initiating, recommending, or providing corrective actions, verifying implementation of corrective actions, stopping unsafe activities, and ensuring compliance with regulations. You are hereby delegated the authority necessary to meet those responsibilities, including prohibiting the use of byproduct material by employees who do not meet the necessary requirements and shutting down operations, when justified, to maintain radiation safety. You are required to notify management if staff does not cooperate and does not address radiation safety issues. In addition, you are free to raise issues with the U.S. Nuclear Regulatory Commission at any time. It is estimated that you will spend 40 hours per week conducting radiation protection activities.
