NRC Names New Senior Resident Inspector at the Diablo Canyon Nuclear Power Plant

The Nuclear Regulatory Commission has selected Mahdi Hayes as the new senior resident inspector at the Diablo Canyon nuclear power plant in San Luis Obispo, California.

Hayes joined the NRC's Region IV office in 2006 as a reactor engineer in the agency's Nuclear Safety Professional Development Program. He served as the resident inspector at Columbia Generating Station from 2009 until 2013, when he became an operations engineer and operator license examiner in the agency's Region IV office in Arlington, Texas.

Prior to joining the agency, he worked as a nuclear engineer for Knolls Atomic Power Laboratory. Hayes received his bachelor's degree in nuclear engineering from Texas A&M University in 2005.

Each U.S. commercial nuclear power plant site has at least two NRC resident inspectors. Hayes joins resident inspector Ayesha Athar. They serve as the agency's eyes and ears at the facility, conducting inspections, monitoring significant work projects, and interacting with plant workers and the public.
