Duke Energy submitted the application pursuant to Title 10 of the *Code of Federal Regulations* Part 54, "Requirements for Renewal of Operating Licenses for Nuclear Power Plants," for SLR.

On July 14, 2022, the NRC staff held a closed public meeting with Duke Energy to discuss the draft response to request for additional information (RAI) B2.1.7-4a (ML22124A142) regarding PWR Vessel Internals.

In support of discussions, the staff had communicated to Duke Energy that of the RAI response, Note 1 should include a basis for the selection of that 50 percent by length acceptance criterion value. During the meeting, the staff and Duke Energy engaged in proprietary technical discussions, which offered Duke Energy a better understanding of information sought as part of RAI B2.1.7-4a.

On July 28, 2022, a follow-up closed public meeting was held where Duke Energy made a proprietary presentation to discuss the basis for the selection of 50 percent by length acceptance criterion value (ML22210A131). In terms of next steps, the staff will continue to
