## General Comment

We live within 10 miles of the Indian Point nuclear power plant that is currently being decommissioned. We feel strongly that rules must be maintained to ensure that we never risk being exposed to an accidental or intentional (e.g. corporate shortcuts, terrorism) radioactive release.

Allowing for release of nuclear waste into the Hudson River is INSANE!

Allowing for reduced security in our current age of terrorism is also INSANE -- you're practically inviting terrorists to attack Indian Point to access material they could potentially use to make a "dirty bomb".

And accidents happen (especially when corporations cut costs while nobody is looking). So it is essential that monitoring for problems (e.g. fire) is always active until such time as the risk goes to ZERO!
