

## UNITED STATES NUCLEAR REGULATORY COMMISSION

REGION III 2443 WARRENVILLE RD. SUITE 210 LISLE, IL 60532-4352

July 28, 2022

Samir Parikh, M.D. Radiation Safety Officer W.A. Foote Memorial Hospital d/b/a Henry Ford Health Jackson Hospital 205 N. East Ave. Jackson, MI 49201

SUBJECT: AMENDMENT OF RADIOACTIVE MATERIALS LICENSE FOR W.A. FOOTE MEMORIAL HOSPITAL, D/B/A HENRY FORD HEALTH JACKSON HOSPITAL, U.S. NRC LICENSE NO. 21-00258-06

Dear Dr. Parikh:

Enclosed is Amendment No. 67 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-00258-06, in accordance with your letter dated May 3, 2022, including the accompanying application dated April 24, 2022, signed by Cheryl Martin, Vice President for Radiology Services, and the letter dated July 27, 2022, signed by Alan M. Jackson, MS, CHP, Medical Health Physicist.

Your license has been amended to reflect the following:

- change of your institution's legal name to W.A. FOOTE MEMORIAL HOSPITAL and the addition of your fictitious name *d/b/a HENRY FORD HEALTH JACKSON HOSPITAL*; and
- addition of Marsel Matka, M.D. as an Authorized User of licensed materials for the performance of imaging and localization studies as described in Title 10 of the Code of Federal Regulations (10 CFR) §35.200.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under 10 CFR Section 51.22(c).

You will be periodically inspected by the U.S. NRC. Failure to conduct your program in accordance with U.S. NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with the U.S. NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that the U.S. NRC expects of its licensees.

The U.S. NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on the U.S. NRC's safety culture Web site at <u>https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html</u>. I encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in U.S. NRC-regulated activities.

In accordance with 10 CFR §2.390 of the U.S. NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the U.S. NRC Public Document Room or from the U.S. NRC's ADAMS, accessible from the U.S. NRC Web site at <a href="https://www.nrc.gov/reading-rm/adams.html">https://www.nrc.gov/reading-rm/adams.html</a>.

Sincerely,

Jason M. Kelly, MPH Health Physicist Materials Licensing Branch
