

Andrews Material Testing Services, Inc.
License No. 21-26172-01
Docket No.: 030-31668

Disposition Plan

The licensee did not response to NRC's request to submit a Termination Request and has been in non-payment of fees since 2018.

Licensee has not possessed licensed material since 2019. See MIB document for supporting information.

- Guidance:
Complete Checklist A.1 – NUREG 1556 Vol 20
- .
- Contact Fee's and let them know that the license is expired and MLB is terminating the license.
- Add all appropriate information to ADAMS to support position – including information from MIB.
- Develop termination letter in accordance with NRC guidance; signature for MLB Chief.

Subject: Andrews Material Testing Services, Inc. - Expired License

Sandy,

The above licensee's license expired June 30, 2022. In addition, the licensee has not paid NRC fees since 2018 and HQ is in the process of Revoking the license (which is mute as the license has already expired). Many attempts were made to get the licensee to send in a termination request – the licensee failed to do so. MIB verified that the licensee transferred all licensed material so there is not a health and safety issue.

As such, I am inclined to issue a termination letter to the licensee and put it into ADAMS thus closing this issue. Attached is some documentation to support the position and language to be used in the letter. Please assign this action to a license reviewer for my signature.

Thank you

Michael LaFranzo
Chief, Materials Licensing Branch
USNRC, Region III
