## General Comment

Is this part of the green new deal to drop the waste into the Hudson River? Why was Indian point shut down in the first place? To hurt nearby residents! Alternative energy sources although welcome are not established yet to help cover the void of fossil and nuclear energy. You are hurting not only the environment but every day people trying to make ends meet. Who is going to clean up the Hudson River? Who is going to oversee the disaster of batteries getting dumped into the garbage! Someone needs to rethink the plan for what's to come.
