SUBJECT: TERMINATION OF RADIOACTIVE MATERIALS LICENSE FOR DTE ELECTRIC COMPANY, U.S. NRC MATERIALS LICENSE NO. 21-02335-06

Dear Ms. Lucier:

In letters dated May 25, 2022 and July 27, 2022, you notified the U.S. Nuclear Regulatory Commission (NRC) of a request to terminate U.S. NRC Materials License No. 21-02335-06. Your letters are available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML22151A273 and ML22230D072.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

I have reviewed records of transfer/disposal of licensed materials and associated leak test reports. Based on my review, I have concluded that all licensable radioactive material has been removed from your facility and residual radioactive material attributable to licensed activities does not exceed current U.S. NRC criteria.

Based on these conclusions, no further remediation or actions are required with respect to U.S. NRC-regulated material. Your facility is suitable for unrestricted use, and U.S. NRC Materials License No. 21-02335-06 is hereby terminated. A copy of the amended license—Amendment No. 25—is enclosed.

In accordance with 10 CFR §2.390 of the U.S. NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the U.S. NRC Public Document Room or from the U.S. NRC's ADAMS, accessible from the U.S. NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

If you have questions, please contact me at (630) 829-9737 or Jason.Kelly@nrc.gov.

Sincerely,
