

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

August 24, 2022

Andrea Ferkile, Director  
for the Office of Nonproliferation  
Office of Nonproliferation and Arms Control  
National Nuclear Security Administration  
U.S. Department of Energy  
1000 Independence Avenue, S.W.  
Washington, D.C. 20585

Dear Dir., Ferkile:

Enclosed is an application (XSNM3830), dated August 23, 2022, received by the U.S. Nuclear Regulatory Commission, from Westinghouse Electric Company (WEC), LLC. The application requests the export of 2,400 kilograms (kg) uranium, enriched up to 5%, containing up to 105 kg U-235, to WEC United Kingdom (UK) contained in lead test assemblies. Some United States (U.S.) fuel rods in the lead test assemblies will be replaced with UK fuel rods, containing up to 6% enriched fuel pellets at the WEC UK site and then exported to the U.S. for use in the Vogtle Nuclear Power Plant.

Any stainless-steel pins removed will be scrapped and remain at the Springfields UK site, while the removed U.S. fuel rods will be returned to WEC Columbia Fuel Fabrication Facility in South Carolina.

Before taking action on this application, we request your assistance in obtaining the necessary assurances from the UK and EURATOM that the material will be subject to all terms and conditions of the agreements for cooperation.

If you have any questions or need additional information, please contact the licensing officer, Joanne Savoy at [Joanne.Savoy@nrc.gov](mailto:Joanne.Savoy@nrc.gov).

Sincerely,

8/24/2022

 Peter J. Habighorst

Janelle B. Jessie
