Secretary U.S. Nuclear Regulatory Commission Rulemakings and  
Adjudications Staff  
Washington, DC 20555-0001

Dear: Secretary Rulemakings and Adjudications Staff,

I write as a citizen born and bred 15 miles from Indian Point. I remember the first proposal from Con Ed was to install a hydro electric pump on Storm King mountain. Wealthy residents put that idea to bed quickly. Then came the frivolous idea to build this sadly early nuclear power plant, built on a fault. These present circumstances make it known to rational people that our world will not survive without nuclear power. This makes it all the more important to decommission Indian Point painstakingly correctly. Not doing that, in the event of one little stupid mistake would be a disaster for building new up to date plants that our electric world is desperate for.

PLEASE DO IT RIGHT

Sincerely,

Alice Weiner
