

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

August 29, 2022

Jeffrey Boyd, M.D.
Radiation Safety Officer
Clark Memorial Hospital
1220 Missouri Ave.
Jeffersonville, IN 47130

SUBJECT: AMENDMENT NO. 46 TO RADIOACTIVE MATERIALS LICENSE FOR
CLARK MEMORIAL HOSPITAL, U.S. NRC MATERIALS LICENSE NO.
13-12367-01

Dear Dr. Boyd:

Enclosed is Amendment No. 46 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 13-12367-01 in accordance with the letters dated May 20, 2022 and June 10, 2022, both signed by Daniel Altman, M.D., Radiation Safety Officer, and the letter dated August 22, 2022, signed by Martin Padgett, CEO.

Congratulations on your appointment as Radiation Safety Officer. Additional information, guidance and resources are available from the agency to assist you. This includes NUREG-1556, Volume 9, Rev. 3, September 2019, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Medical Use Licenses," particularly including Appendix I, "Radiation Safety Officer Duties, Responsibilities and Delegation," and Appendix L, "Model Medical Licensee Audit." This guidance document is available on the U.S. NRC website at: <https://www.nrc.gov/docs/ML1925/ML19256C219.pdf>

In addition to identifying your appointment as Radiation Safety Officer, your license has also been amended to add several additional Authorized Users.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under [Title 10 of the Code of Federal Regulations \(CFR\) Section 51.22\(c\)](#).

You will be periodically inspected by the U.S. NRC. Failure to conduct your program in accordance with U.S. NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with U.S. NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the U.S. NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with U.S. NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that the U.S. NRC expects of its licensees.

The U.S. NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on the U.S. NRC's safety culture website at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. I encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in U.S. NRC-regulated activities.

In accordance with [10 CFR §2.390 of the U.S. NRC's "Rules of Practice and Procedure."](#) a copy of this letter and its enclosure will be available electronically for public inspection in the U.S. NRC's Public Document Room or from the U.S. NRC's ADAMS, accessible from the U.S. NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Jason M. Kelly, MPH
Health Physicist
Materials Licensing Branch
