

LICENSE FOR INDEPENDENT STORAGE OF SPENT NUCLEAR FUEL AND HIGH-LEVEL RADIOACTIVE WASTE

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, *Code of Federal Regulations*, Chapter 1, Part 72, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, and possess the power reactor spent fuel and other radioactive materials associated with spent fuel storage designated below; to use such material for the purpose(s) and at the place(s) designated below; and to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified herein.

<p style="text-align: center;">Licensee</p> <p>1. GE-Hitachi Nuclear Energy Americas, LLC</p>	<p>3. License No. SNM-2500</p> <p>Amendment No. 15</p>
<p>2. GE-Hitachi Nuclear Energy Americas, LLC 7555 East Collins Road Morris, Illinois 60450</p>	<p>4. Expiration Date May 31, 2042</p> <p style="padding-left: 40px;">Renewed December 21, 2004</p> <p style="padding-left: 40px;">Subsequently Renewed on November 22, 2022</p>

|--|--|---|
| <p>6. Byproduct, Source, and/or Special Nuclear Material</p> <p>A. Fuel assemblies from reactors using natural water for cooling and enriched not greater than 5 percent U-235. These fuels and associated materials related to storage and transfer of fuel assemblies will possibly contain:</p> <ol style="list-style-type: none"> 1. Uranium 235 2. Plutonium 3. Fission and activation Products <p>B. Byproduct and special nuclear material</p> | <p>7. Chemical or Physical Form</p> <p>A. 1. As UO₂ clad with zirconium or zirconium alloys.</p> <p style="padding-left: 40px;">2. Liquid and Solid Waste Treatment Products</p> <p>B. As solutions, calibration discs sealed source or in other form specific in Table A</p> | <p>8. Maximum Amount That Licensee May Possess at Any One Time Under This License</p> <p>A. 1. 37.5 MT
2. 9.0 MT
3. 2.5x10⁹ Ci</p> <p>B. Quantities possessed be no greater than that specified in Table A</p> |
|--|--|---|

9. Authorized Use: The material identified in 6.A and 7.A above is authorized for possession and storage at the Morris Operation, and transfer as described in NEDO-21326, the approved General Electric Morris Operation Consolidated Safety Analysis Report (CSAR), as supplemented and amended in accordance with 10 CFR 72.70 and 10 CFR 72.48. Material identified in 6.B, 7.B and 8.B is to be used for calibration and standardization purposes.

	SNM-2500	15	
LICENSE FOR INDEPENDENT STORAGE OF SPENT NUCLEAR FUEL AND HIGH-LEVEL RADIOACTIVE WASTE SUPPLEMENTARY SHEET		Docket or Reference No.	72-1

10. Authorized Place of Use: The licensed material is to be possessed, transferred, and stored at the Morris Operation located in Grundy County, Illinois, near Morris, Illinois. This site is described in Chapter 1 and 3 of the licensee's CSAR for the Morris Operation.

Table A. Authorized materials – instrument, calibration, and laboratory sources

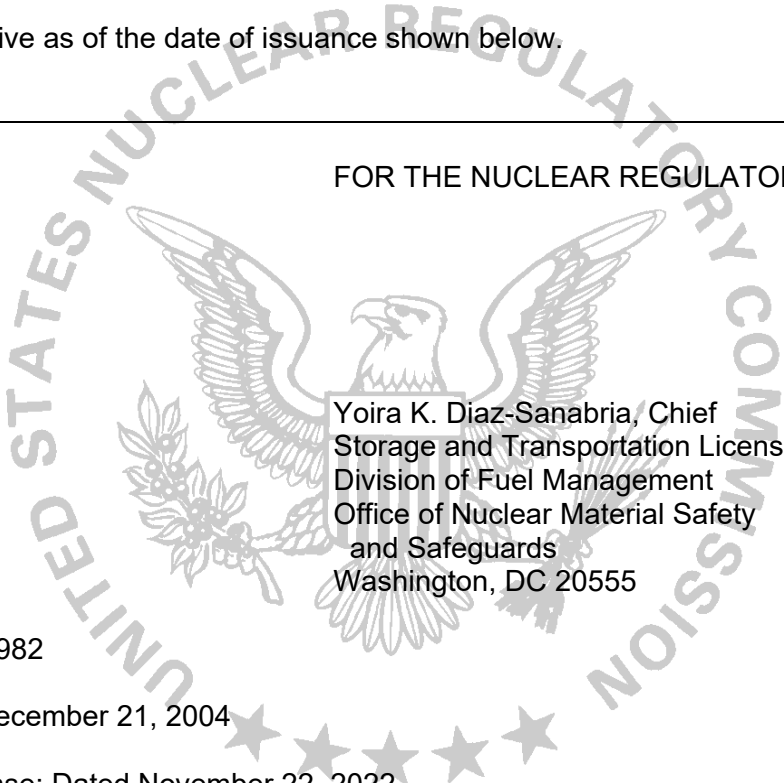

Materials	Chemical and/or Physical Form	Quantity
Radionuclides with atomic numbers ranging from 1 to 83	Solution or calibration disc	Total Aggregate of 5 curies
Cobalt-60	Sealed source	10 curies
Cesium-137	Sealed source	10 curies
Thorium-230	Any	1 millicurie
Neptunium	Any	20 grams
Plutonium	Any	50 grams
Uranium-235 (In uranium or any enrichment)	Any	250 grams
Americium-241	Any	200 µCi
Americium-241	Sealed source	40 curies
Plutonium-Beryllium	Sealed source	2 curies
Uranium-natural	Any	15 kilograms

11. Pursuant to 10 CFR Part 40 the licensee is authorized to possess, store, and transfer a combined quantity of unirradiated natural and unirradiated depleted uranium not to exceed 42 tonnes. This limitation does not include uranium in stored fuel or uranium used in construction of shipping casks. Natural UO₃, UO₂, UNH, and UF₆, used during Midwest Fuel Recovery Plant (MFRP) testing may be stored in process vessels in the Canyon area or in the site warehouse.
12. No changes shall be made to the Radiological Emergency Plan for Morris Operation, NEDO-31995, which would decrease the effectiveness of the emergency plan without the prior approval of the Commission as evidenced by a license amendment. The licensee shall maintain implementing procedures for the Radiological Emergency Plan as necessary. The licensee shall maintain records of changes that are made to the plan without prior approval for a period of two years from the date of the change. Within six months of such change the licensee shall furnish the Director, Office of Nuclear Materials Safety and Safeguards, and the NRC Region III Office a report containing a description of each change.
13. The Technical Specifications contained in Appendix A attached hereto, as revised through the issuance of the subsequent renewed license, are incorporated into the license. The licensee shall operate the installation in accordance with the Technical Specifications in Appendix A. Appendix A contains Technical Specifications related to Environmental Protection to satisfy the requirements of 10 CFR 72.44(d)(2).
14. The licensee shall follow the physical protection plan entitled "Physical Security Plan for Morris Operation, NEDS-14507," Revision D5, dated April 1995; and as it may be further amended under the provisions of 10 CFR 72.44(e) and 72.180. The requirements of 10 CFR Part 73, Appendix B for guard training and qualification are incorporated in Section 3.4, "Security Force Training and Qualification," of the approved security plan. The requirements of 10 CFR Part 73, Appendix C, for contingency planning are addressed in Section 9.0 of the physical security plan.

			Docket or Reference No.	72-1			

15. Within 90 days after issuance of the subsequent renewed license, the licensee shall submit an updated CSAR to the NRC, in accordance with 10 CFR 72.4, and continue to update the CSAR pursuant to the requirements in 10 CFR 72.70(b) and (c). The updated CSAR shall reflect the Draft Revision 15A to the CSAR, as documented in Attachment 3 of the May 12, 2022, submittal (Agencywide Documents Access and Management System (ADAMS) Accession No. ML22132A072). The licensee may make changes to the updated CSAR, consistent with 10 CFR 72.48(c).
16. Within one year after issuance of the subsequent renewed license, the licensee shall create, update, or revise procedure(s) for implementing the activities in the aging management programs described in the updated CSAR. The licensee shall maintain the procedure(s) throughout the term of this license.
17. This license is effective as of the date of issuance shown below.
