

The staff will use these comments to inform a summary report on lessons learned from construction oversight. Participants may submit written comments prior to the meeting or provide verbal comments during the meeting.

The NRC provides reasonable accommodations to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in a meeting or need a meeting notice or the transcript or other information from a meeting in another format (e.g. braille, large print), please contact Anne Silk, NRC Reasonable Accommodations Coordinator, at Anne.Silk@nrc.gov or call directly at 301-287-0745. Determinations on requests for reasonable accommodation will be made on a case-by-case basis. Ten (10) days' advance notice is requested to try to ensure availability; however, every effort will be made to address a request for reasonable accommodations with less notice.

PUBLIC MEETING AGENDA

Notice of Meeting With Southern Nuclear Operating Company

September 27, 2022, 09:00 AM to 11:00 AM ET

Teleconference

<i>Time</i>	<i>Topic</i>	<i>Speaker</i>
OPEN		
9:00 a.m.	Introductions and Opening Remarks	NRC
9:05 a.m.	NRC Staff Presentation on Lessons Learned from Construction and Oversight of Vogtle 3 and 4	NRC
9:20 a.m.	Southern Nuclear Company Presentation	SNC
10:00 a.m.	Break	
10:10 a.m.	Public Comments	Public
11:00 a.m.	Adjourn	

The NRC staff looks to collect feedback in the following general areas:

1. Inspections, tests, analyses, and acceptance criteria (ITAAC) – How can the scope, interpretation, and overall use of ITAAC in combined licenses be improved for future Part 52 applications? How can ITAAC be upgraded to reduce any experienced administrative burden?
2. Licensing – What are your observations regarding the process for changing combined licenses under Part 52? Specifically, what could be improved on the license amendment, exemption, and preliminary amendment review (PAR) processes? How beneficial and effective were the practices of maximizing the use of pre-submittal meetings and the processes for identifying and reviewing “high complexity” licensing actions?
3. Inspection – How can the NRC improve the construction inspection program? Regarding construction and ITAAC findings, were the results of the issue screening process appropriately risk-informed? How can the process be improved? If future designs rely on increased vendor and manufacturer fabrication of reactor plant structures, systems, and components, how could the current inspection process be optimized to meet those needs?
