**Amendment Request for
Idaho Falls Community Hospital
License #11-35569-01**

Dear DNMS Licensing Assistant,

Idaho Falls Community Hospital would like to make an amendment to the existing Radioactive Materials License.

1. Increase Dr. Madsen authorization to 35.300.

I can confirm that beginning May 6, 2008, Dr. Daniel Madsen was approved under Utah Radioactive Materials License #UT1800001. This license allows the University of Utah Radiation Safety Committee to name Authorized Users. Dr. Madsen was approved for type "10 CFR 35.100 Use of unsealed byproduct material for uptake, dilution, and excretion studies for which a written directive is not required"; For type "10 CFR 35.200 Use of unsealed byproduct material for imaging and localization studies for which a written directive is not required"; And for type "10 CFR 35.300 Use of unsealed byproduct material for which a written directive is required."

If you have any questions or require additional documentation, please don't hesitate to reach out to my contact information listed below.

Thank you very much,

David Theel, DABR
Radiation Safety Officer
