

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION IV  
1600 EAST LAMAR BOULEVARD  
ARLINGTON, TEXAS 76011-4511

June 29, 2022

Mr. Cleve Reasoner, Chief Executive Officer  
and Chief Nuclear Officer  
Wolf Creek Nuclear Operating Corp  
P.O. Box 411  
Burlington, KS 66839

SUBJECT: WOLF CREEK GENERATING STATION – REQUEST FOR INFORMATION  
FOR AN NRC POST-APPROVAL SITE INSPECTION FOR LICENSE  
RENEWAL 05000482/2022012

Dear Mr. Reasoner:

On October 17, 2022, the Nuclear Regulatory Commission (NRC) will begin a Post-Approval Site Inspection for License Renewal for your facility. Two inspectors will perform this one-week inspection in accordance with NRC Inspection Procedure 71003. This Phase 1 inspection focuses on reviewing the facility material condition, outage related activities to verify that license conditions added as part of your renewed license, and a sample of license renewal commitments have been implemented.

To minimize the inspection impact on the site and to ensure a productive inspection for both parties, we have enclosed a request for information needed for the inspection. It is important that all these documents are up to date and complete to minimize the number of additional documents requested during the preparation and/or the on-site portions of the inspection. Please provide this information electronically to the lead inspector. The information request has two groups:

- The first group lists information necessary for our initial inspection scoping and in-office preparation activities. During the in-office preparation activities, the team will identify as much as possible the information and activities to be reviewed during the inspection. This information should be provided to the lead inspector by August 22, 2022.
- The second group includes additional information required for the team to review the selected activities. This information should be available to the team on October 17, 2022. It is also requested that corrective action documents and/or questions developed during the inspection be provided to the lead inspector as the documents are generated.

#### PAPERWORK REDUCTION ACT STATEMENT

This letter contains mandatory information collections that are subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). The Office of Management and Budget (OMB) approved these information collections (approval number 3150-0011). Send comments regarding this information collection to the Information Services Branch, Office of the Chief Information Officer, Mail Stop: T6 A10M, U.S. Nuclear Regulatory Commission, Washington,

DC 20555-0001, or by e-mail to [Infocollects.Resource@nrc.gov](mailto:Infocollects.Resource@nrc.gov), and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0011) Office of Management and Budget, Washington, DC 20503.

PUBLIC PROTECTION NOTIFICATION

The NRC may not conduct nor sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid OMB control number.

This letter and its enclosure will be made available for public inspection and copying at <http://www.nrc.gov/reading-rm/adams.html> and at the NRC Public Document Room in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390, "Public Inspections, Exemptions, Requests for Withholding." Your cooperation and support during this inspection will be appreciated.

The lead inspector for this inspection is Greg Pick. If there are any questions about the inspection or the material requested in the enclosure, please contact the lead inspector at (817) 200-1270 (w), (817) 504-2105 (m) or via e-mail at [greg.pick@nrc.gov](mailto:greg.pick@nrc.gov).

Sincerely,

Signed by Pick, Gregory  
on 06/29/22

Greg Pick, Senior Reactor Inspector  
Engineering Branch 2  
Division of Operating Reactor Safety

## ***Post-Approval Site Inspection for License Renewal Request for Information***

### ***I. Information Requested Prior to the On-site Inspection – required by August 22, 2022***

If you have any questions regarding this information request, please call the team leader as soon as possible. If a secure document management service is utilized, it is recommended that a separate folder be used corresponding to each item listed below. It is recommended that multiple documents within each folder be individually entered and also combined into a ZIP file uploaded into the same folder. Documents should be identified by both document number and noun name. Electronic media on compact disc or paper records (hard copy) are also acceptable.

Please provide the information electronically in “pdf” files, Excel, or other searchable formats, preferably on some portable electronic media (e.g., CDROM, DVD, flash drive, etc.). The portable electronic media should contain descriptive names and be indexed and hyperlinked to facilitate ease of use. Information in “lists” should contain enough information to be easily understood by someone who has knowledge of light water reactor technology.

1. Provide a list of your license renewal commitments associated with appropriate aging management programs. Include the completion status of each. For those not yet complete, please provide an estimated completion date.
2. Provide a list of your aging management programs, copies of the program basis document for each and/or any associated plant program. Please include a listing of the action tracking items for each.
3. For aging management programs that are one-time inspection programs, provide a list of completed work order numbers for inspections that have been completed. This should include identification of the inspected component.
4. Provide a listing of planned inspections that will be conducted during the onsite week, credited for license renewal, that provide observations of areas that are generally inaccessible at power (e.g., containment liner and containment coating inspections). If there are no inspections planned, the inspectors will select areas normally inaccessible that will need to be reviewed.
5. Provide current management and license renewal organizational charts, electronic copies of Updated Final Safety Analysis Report, Technical Specifications, Technical Specifications Bases, and Technical Requirements Manual.
6. Provide copies of any internal/external self-assessments and associated corrective action documents generated in preparation for the inspection.

**II. Information Requested to be Available When the Inspectors Arrive On-site on October 17, 2022**

1. Copies of the work orders requested during the preparation week related to the selected commitments/aging management programs. This will include work orders of inspections to be observed and completed work orders to be reviewed by the team.
2. Contact information to facilitate inspector observation of the selected work activities or evaluation of inaccessible areas.
3. Documentation demonstrating completion of license renewal commitments considered completed as of the inspection date. For example, this may be in the form of a binder for each commitment that includes the implementing documentation and references.

**III. Information Requested to be Provided Throughout the Inspection**

1. Copies of any corrective action documents generated because of the team's questions or queries during this inspection.
2. Copies of the list of questions submitted by the team members and the status/resolution of the information requested (provide daily during the inspection to each team member).

If you have questions regarding the information requested, please contact the lead inspector.
