Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Additional Information

The NRC is issuing for public comment a DG in the NRC's "Regulatory Guide"

series. This series was developed to describe methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, to explain techniques that the staff uses in evaluating specific issues or postulated events, and to describe information that the staff needs in its review of applications for permits and licenses.

The DG, entitled "Cybersecurity Event Notifications," (ADAMS Accession No. ML22250A443) is temporarily identified by its task number, DG-5079, which is proposed Revision 1 of RG 5.83 of the same name.

The DG describes methods that the staff of the NRC considers acceptable for licensees to report and record cybersecurity events as required under section 73.77 of title 10 of the *Code of Federal Regulations* (10 CFR), "Cyber security event notifications." This guide applies to nuclear power reactor licensees that are licensed to operate under 10 CFR part 50, "Domestic Licensing of Production and Utilizations Facilities," or 10 CFR part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants."

The staff is also issuing for public comment a regulatory analysis (ADAMS Accession No. ML22250A472). The staff developed a regulatory analysis to assess the value of issuing or revising a regulatory guide as well as alternative courses of action.

As noted in the *Federal Register* on December 9, 2022 (87 FR 75671), this document is being published in the "Proposed Rules" section of the *Federal Register* to comply with publication requirements under 1 CFR chapter I.

III. Backfitting, Forward Fitting, and Issue Finality

Issuance of DG-5079, if finalized, would not constitute backfitting as defined in 10 CFR 50.109, "Backfitting," and as described in NRC Management Directive (MD) 8.4, "Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests" (ADAMS Accession No. ML18093B087); constitute forward fitting as that term is defined

and described in MD 8.4; or affect issue finality of any approval issued under 10 CFR part 52, “Licenses, Certifications, and Approvals for Nuclear Power Plants.” As explained in DG-5079, applicants and licensees would not be required to comply with the positions set forth in this guide.

IV. Submitting Suggestions for Improvement of Regulatory Guides

A member of the public may, at any time, submit suggestions to the NRC for improvement of existing RGs or for the development of new RGs. Suggestions can be submitted on the NRC’s public website at <https://www.nrc.gov/reading-rm/doc-collections/reg-guides/contactus.html>. Suggestions will be considered in future updates and enhancements to the “Regulatory Guide” series.

Dated: April 18, 2023.
