Good Afternoon,

I received a call from Dr. Sappington regarding the incorrect location of use address for this license (06-30814-01 / 03036256) and therefore needs a corrected copy. Would you please process this as a corrected copy and assign to me?

Thanks!
Bob

Subject: Materials License Misconstruction

Dear Penny,

As you know we just discovered a line on the Materials License that was placed there. By way of background, Mr. Guildea was charged with the onboarding and took care of the delay of the sale of the Nuclear Lab, dealing with the approval by the NRC of the sale. He also took care of getting the new Nuclear Materials License. Somehow on page two the address at 1000 Asylum was added instead of Hebron Ave. in Glastonbury. How they would get an address at One Thousand Asylum is a mystery. The Nuclear Lab has always been in Glastonbury!

In any case both Peter Mas and I will reach out to the NRC and inform them of the problem. We will ask for the line to be changed. In the meantime, the lab will be halted, and all radioisotopes will be boarded at Cardinal Health Laboratory.

Sincerely,

Dr. Joe Sappington
