**Subject:** Request for additional information- NRC license no. 21-04127-02  
**Date:** Monday, August 1, 2022 3:30:00 PM

---

Good afternoon,

I have reviewed your request dated May 12, 2022, pertaining to the addition of locations of use.

In a signed and dated letter, please provide additional information:

1. Please clarify whether the injections will occur in designated rooms at the three locations that you requested to be added to the license or the rooms will vary throughout the facilities/hospitals.
2. If you will designate specific rooms, please provide room diagrams in accordance with guidance, NUREG 1556, Volume 9, Revision 3 (if applicable).
3. Please clarify the proximity of these locations to your main location at 3990 John R. St., Detroit, Michigan.
4. Please explain who will deliver the material and whether the personnel will be trained. Please describe the training.
5. Please clarify whether any surveys will be conducted after administration of the material to control exposure/contamination.
6. Please describe your response to spills/contamination events.

Also, please note that adding three additional locations of use will result in an increased annual fee (for a license with 6-20 locations).

Please acknowledge receipt of this email.

Please respond by 8/22/2022.

Thank you

Magdalena R. Gryglak
