---

My apologies for the confusion. When I was assigned this action to review, I was unaware that any work had been done on the renewal at all.

I do not have a copy of the May 2, 2022 letter to Colleen Casey. I will wait for Colleen to confirm if that letter was received, and to confirm if she will complete this action or if she wants me to complete it.

I appreciate your patience while we figure out the best way to get this done.

Betsy

**Subject:** [External\_Sender] Control no. 627178 / Gerdau Monroe Mill license renewal

Ms. Ullrich and Mr. Tran,

We hope this note finds you both well. Mr. Hartford and I had opportunity to speak last week and realized that we were both addressing separate correspondence with the NRC and we wanted to confirm what was required at this point to continue our license renewal. As current, we are in the process of responding to two separate inquires, which we'd like to reconcile into a single response. In addition, several items in Ms. Ullrich's letter overlap with information provided to Ms. Colleen Casey in our May 2<sup>nd</sup>, 2022 response letter. We would like to confirm that this information provided to Ms. Casey was received & available for review as satisfactory, as we believe that response satisfied elements of Ms. Ullrich's request. If not readily available, we can provide a digital copy of the letter & materials sent to Ms. Casey this past May.

In Ms. Ullrich's letter, point #1 asks if Mr. Hartford or Mr. Hessler will serve as Radiation Officer for the site. Mr. Hessler will serve as radiation officer. His training credentials and a site delegation of

authority letter were provided in the May response to Ms. Casey. Please confirm this information was received.

In Ms. Ullrich's letter, point #2 inquires regarding the company name on the license. For the purpose of the license, the site will be "Gerdau Monroe Mill" as previously used. Additional information and clarification were provided to Ms. Casey in May. Please confirm this will be acceptable.

In Ms. Ullrich's letter, point #3 inquires regarding Mr. Andrew Hansen's training credentials. These were provided to Ms. Casey in May 2022 with his inclusion in the license renewal. We greatly appreciate the guidance regarding how to include new users and appreciate feedback regarding where to include authorized user criteria in the application. That language was not apparent in the completion of Appendix B from NUREG unless provided as an alternative procedure. Based on feedback from Ms. Casey, we endeavored to minimize the number of alternate procedures provided with the application and make a more strict adherence to Appendix B in NUREG for our renewal.

In Ms. Ullrich's letter, point #4 asks for any additional pertinent changes since our license renewal application. As this time, there are no changes to application needed.

Regarding the inquiry from Mr. Tran, we will address changes according to points 1 & 2 in a response letter.

In reviewing the above, can we confirm the required scope of the response needed by Gerdau – Monroe Mill in order to provide our most comprehensive answer toward completing our renewal. If you have any questions or concerns, please do not hesitate to contact us. We look forward to finalizing our response and completing our renewal application.

Best regards,

Christopher Hessler
