## General Comment

As a member of C-10 from the beginning of Seabrook, I have many fears about any nuclear event anywhere in the U.S. Years ago a very good friend who designed/oversaw numerous Nuclear plants in Europe and the far east. we argued a lot. A few years later, he apologized for his lack of engagement/knowledge in any U.S. plant operations. We all know what happened to Fukushima. Let's not continue to allow the NRC to short change the decommissioning of Pilgrim. Allowing rule changes in the Regulatory Improvement for Production and Utilization Facilities Transitioning to Decommissioning including handing more of the reins to private companies like Holtec. . I fully agree with the comments of C-10. Victoria Carr
