Blair, NE 68008

SUBJECT: U.S. NUCLEAR REGULATORY COMMISSION'S ANALYSIS OF OMAHA
PUBLIC POWER DISTRICT'S DECOMMISSIONING FUNDING STATUS
REPORT FOR FORT CALHOUN STATION, UNIT NO. 1, DOCKET NO. 50-285

Dear Timothy Uehling:

By letter dated March 30, 2022, the U.S. Nuclear Regulatory Commission (NRC) received your decommissioning funding status (DFS) report (Agencywide Documents Access and Management System (ADAMS) Accession No. ML22090A078 (Non-Public)) for Fort Calhoun Station, Unit No. 1 (Fort Calhoun).

The NRC has reviewed and analyzed the site-specific decommissioning cost estimate, as required in Title 10 of the *Code of Federal Regulations* (10 CFR) 50.82(a)(4)(i), "[Termination of license – For power reactor licensees](#)," and the amount(s) stated within the licensee's decommissioning trust fund, as of December 31, 2021, for the above plant, as well as earnings assumptions. Based on the reported decommissioning trust balance, together with earnings credits specified under NRC regulations, the NRC has determined that as of December 31, 2021, Omaha Public Power District (OPPD), is providing a total amount of decommissioning funding assurance in the amount of \$519,701,336 for Fort Calhoun.

This letter confirms the correspondence, described above, regarding DFS reports for permanently shut down power reactors as required under 10 CFR 50.82(a)(v) - (vi). As of the date of this letter, considering the available information, the NRC has determined that OPPD has satisfied the decommissioning funding assurance requirements of 10 CFR 50.82 for Fort Calhoun on December 31, 2021.

In accordance with 10 CFR 2.390, "[Public inspections, exemptions, requests for withholding](#)," of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. ADAMS is accessible from the NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

T. Uehling
