[Form313.pdf](#)

Good Afternoon Michael,

I look forward to speaking with you later this afternoon regarding your renewal application. We will need additional information in order to renew your license. For your convenience I have included a list below of the information I will need:

1. Please provide a complete NRC form 313 (attached) For your convenience, you may re-submit the 313 form that you included with your original renewal submission dated January 27, 2022.
2. For your convenience and the streamlined handling of fixed gauge applications, you may use Appendix B, "Suggested Format for Providing Information Requested in Items 5 through 11 of NRC Form 313," to [NUREG 1556 Vol. 4 rev. 1](#) to provide supplemental information. I have attached a fillable PDF copy of this checklist to this email. If you choose to use this checklist, please note that we will need the following information:

For Items 5 and 6 provide:

- Each radionuclide and maximum activity of each source per gauge model, and confirmation that the activity per source and maximum activity per gauge will not exceed the maximum activity listed in the approved certificate of registration issued by the NRC or by an Agreement State.
- Manufacturer (or distributor) and model number for each type of gauge.
- Maximum number of gauges to be possessed and used under the license, by manufacturer and model number.
- Purpose for which the gauges will be used, such as "to measure physical properties of materials," and confirmation that all gauges will be used as listed in accordance with the applicable and approved certificate of registration issued by the NRC or by an Agreement State.
- You may use a supplemental page to submit additional devices if you do not have enough space provided in the checklist

For Item 10.8 please note:

- There are **two** checkboxes in this section, one for Routine Cleaning and Operation and one for Nonroutine Maintenance. You will need to make a selection for each.

Please provide this documentation by Friday July 22, 2022. If you have any additional question, please feel free to give me a call.
