SUBJECT: RENEWAL OF RADIOACTIVE MATERIALS LICENSE FOR TUV RHEINLAND INDUSTRIAL SOLUTIONS, INC., NRC LICENSE NO. 37-32340-02

Dear Mr. Dugan:

Enclosed is Amendment No. 3 renewing TUV Rheinland Industrial Solutions, Inc.'s (your) U.S. Nuclear Regulatory Commission (NRC) Materials License No. 37-32340-02 in accordance with your March 25, 2022 renewal application, with the exception of removing previously submitted field station facilities information. Your renewal application is available electronically from the NRC's Agencywide Documents Access and Management System (ADAMS) at Accession No. ML22088A052. The NRC's ADAMS is accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Please review the enclosed document carefully, and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III Office at 630-829-9892 so that we may provide appropriate corrections and answers.

Please note that we have generated this license using the NRC's electronic Web-Based Licensing (WBL) system. Please also note that we have deleted Condition No. 15 in accordance with current NRC policy to include the reference to Title 10 of the *Code of Federal Regulations* (10 CFR) Part 71, "Packaging and Transportation of Radioactive Material," in the preamble, on page 1 of the license.

**To remove references to letters submitted prior to your March 25, 2022 renewal application, please submit a signed and dated letter, attaching current facility diagrams describing the locations of use, as requested in a second enclosure to this letter.** Please note that the references in the enclosure have been taken from NRC's guidance document, NUREG-1556, Vol. 2, rev. 1 "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Industrial Radiography Licenses." In addition to updated facility information, please provide additional sealed source and device information, including specific manufacturer and model information for source changers to be authorized under this license. Please note that there are a total of seven bulleted items in the attached annotated NUREG 1556, Vol. 2, rev. 1 guidance document. **Please respond to all seven items when providing updated facility and materials information, as part of your next amendment request.**

An environmental assessment for this action is not required because this action is categorically excluded under 10 CFR 51.22(c).

Enclosure 1 to this letter contains sensitive security-related information.  
When Enclosure 1 is separated from this cover letter, this letter is uncontrolled.

C. Dugan

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) RIS 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through NRC's ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC's Generic Communications Web page under "Regulatory Issue Summaries" at <https://www.nrc.gov/reading-rm/doc-collections/gen-comm/>, and the link for frequently asked questions regarding protection of security-related sensitive information may be located at <https://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS.

Sincerely,

Sara A. Forster  Digitally signed by Sara A. Forster
