Greyson and Steve –

In our August 23, 2022 acknowledgement email, the NRC staff communicated its intent to initiate a regulatory review to identify and understand the unique issues contained in Disa's application. Staff initially planned to complete this activity by October 2022.

I'm writing to inform you that completion of our regulatory review will be delayed. Staff now plans to complete its regulatory review in November 2022.

Additionally, our initial acknowledgement email did not identify a completion date for our acceptance review. We anticipate being able to complete our acceptance review in December 2022.

Doug
