RE: Canceling NRC License Number 19-14125-01

Dear Mr. Welling,

This letter is to cancel our NRC License Number 19-14125-01 (License) issued on September 12, 2012, due to expire on December 31, 2022, to the EPA Region III Environmental Science Center (ESC or Facility) located in Fort Meade, Maryland.

The ESC received the License, issued by NRC, for the use of 11 electron capture detectors (ECDs) by ESC personnel. The 11 ECDs are sealed source, model G2397A. These ECDs are used to detect trace amounts of chemical compounds in a sample at the lab and are not to be moved away from the Facility.

Our sources (ECDs), managed under our License, have never experience a leak, and we conduct leak detection samples on each unit every six months.

At the ESC, we are committed to comply with all regulatory requirements in the use of the ECDs (General License). We will continue our ECDs inventory and leak detection every six months. Also, we will continue our dosimeter program, annual self-assessments and the ESC Radiation Safety Committee meetings.

If you have any questions or concerns, please don't hesitate to contact me.

Sincerely,

JOSE

JIMENEZ
