**Subject:** [External\_Sender] Re: Additional Information Request re Western Michigan University renewal application, NRC License No. 21-03336-01, CN 630726

Sara:

Yes, confirming we are requesting the removal of the H-3 foil sources from the license. Trying to get to the point that we do not have any extra materials on the license if we either do not need it anymore or if we never had them.

Thank you for asking for the clarification.

Respectfully,  
Jim

Thank you for the additional information, Jim.

I have a question regarding the GC sources. Are you confirming that the Tritium sources were never used – to your knowledge – under the license, and as such the tritium sources for use in gas chromatography should be removed from the license?

Besides this clarification, we will let you know if anything else is needed to complete the review.

Thank you,

Sara Forster  
U.S. NRC
