SUBJECT: ENRICO FERMI ATOMIC POWER PLANT, UNIT 1 - U.S. NUCLEAR
REGULATORY COMMISSION'S ANALYSIS OF DTE ELECTRIC COMPANY'S
DECOMMISSIONING FUNDING STATUS REPORT (DOCKET NO. 50-016)

Dear Eric Olson:

By letter dated March 31, 2022, the U.S. Nuclear Regulatory Commission (NRC) received the decommissioning funding status (DFS) report for the Enrico Fermi Atomic Power Plant, Unit 1 (Fermi 1) (Agencywide Documents Access and Management System (ADAMS) Accession No. [ML22090A097](#)), which was submitted by the DTE Electric Company (DTE, the licensee).

The NRC has reviewed and analyzed the site-specific decommissioning cost estimate for this facility, as required by Section 50.82, "Termination of license – For power reactor licensees," of Title 10 of the *Code of Federal Regulations* (10 CFR). The NRC staff also verified the amount(s) stated within the licensee's decommissioning trust fund for Fermi 1 as of December 31, 2021, as well as earnings assumptions and the balance of any other decommissioning funds. Based on the reported decommissioning trust fund balance, the NRC has determined that as of December 31, 2021, DTE is providing a total amount of decommissioning funding assurance in the amount of \$3 million in 2021 dollars for Fermi 1, with an additional \$35 million available via a DTE Energy (parent company) guarantee for additional financial assurance.

This letter confirms the correspondence, described above, regarding DFS reports for permanently shut down power reactors as required under 10 CFR 50.82(a)(8)(v) - (vi). As of the date of this letter, considering the available information, the NRC has determined that DTE has satisfied the decommissioning funding assurance requirements of 10 CFR 50.82 for Fermi 1 as of December 31, 2021. A summary report reflecting decommissioning power reactor DFS is expected to be completed and made publicly available by the end of calendar year 2022.

In accordance with 10 CFR 2.390, "Public inspections, exemptions, requests for withholding," of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. ADAMS is accessible from the NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

E. Olson
