Subject: Email Summary of Calls with TRISO-X to Discuss Draft Responses to the Request for Supplemental Information

The Nuclear Regulatory Commission (NRC) issued Requests for Supplemental Information (RSI) for the TRISO-X License Application via letter dated August 9, 2022 (ADAMS Accession No. ML22166A042). On September 27, 28, and October 4, the NRC staff held calls with TRISO-X staff to discuss their draft responses to the RSIs. The NRC staff provided feedback on recommendations to improve the responses to facilitate resolution of the RSIs. The TRISO-X staff plans to providing responses to the RSIs and updates the licensing documents, where appropriate. TRISO-X plans to submit the RSI responses by October 14 and the updated licensing documents by November 4. The NRC staff recommended TRISO-X also provide a working draft of the revised licensing documents with redline strikeout to facilitate the NRC staff's review.

The meeting participants included the NRC technical reviewers, supporting branch chiefs, TRISO-X technical staff, and several members of the public (for the public portion).

The NRC technical reviewers include the following individuals:

| Review Discipline | Primary Reviewer |
|--|-----------------------------------|
| Project Managers | Matt Bartlett and Jonathan Rowley |
| Integrated Safety Analysis | Mike Call |
| Nuclear Criticality Safety | Jeremy Smith |
| Chemical Safety | James Hammelman |
| Fire Safety | Jimmy Chang |
| Structural Design | Juan Lopez |
| Geotechnical Information | Amit Ghosh |
| Electrical and Instrumentation and control | Ming Li and David Rahn |
| Human Factors | Martin Kamishan |
| Environmental Project Manager | Jill Caverly and Marla Morales |

Sincerely,

Matt Bartlett
