Subject: U.S. NRC Materials License No. 24-24405-01

Mr. McIlvain:

I have reviewed the request dated September 2, 2022, signed by Tiffany Mason, Chief Operating Officer, requesting an amendment to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 24-24405-01. Upon review, I identified the following area in which additional or clarifying information is needed:

Title 10 of the *Code of Federal Regulations* (10 CFR) §30.33(a)(2) identifies that the proposed facilities must be adequate to protect public health and minimize danger to life or property.

The request did not identify if means are available for restricting unauthorized access to the proposed additional location of use, which is needed to ensure that radiation doses are maintained as low as reasonably achievable (ALARA) and within the acceptable dose limits for individual members of the public.

Please confirm that access controls are available and utilized for restricting access to the proposed additional location of use when radioactive materials are present.

Please respond to this request within 15 calendar days. In the response, please reference U.S. NRC Materials License No. 24-24405-01 and Control Number 632353 to ensure proper routing. You may submit the response letter directly to me via e-mail, but I recommend that you request an e-mail receipt or other acknowledgement that the response has been received.
