**Subject:** Acknowledgment - Response to NOV

Good afternoon Brian,

This email formally acknowledges receipt of the letter from Tyme Engineering dated October 25, 2022 in response to the U.S. Nuclear Regulatory Commission's (NRC's) letter dated September 15, 2022, transmitting a Notice of Violation. In this letter, you confirmed the root cause of the violation and described the corrective actions that Tyme Engineering has taken to restore compliance and to address the potential for recurrence. These corrective actions included a commitment to request an amendment to your license; that request was subsequently received by our Materials Licensing Branch on October 27, 2022, and has been entered into our Web Based Licensing system under control no. 633344.

The NRC has reviewed your corrective actions, which appear to be adequate, and has no further questions at this time. The effectiveness of these corrective actions will be examined during a future inspection. Your amendment request will be reviewed by a member of the Materials Licensing Branch. If they have any questions or require any additional information, they will reach out to you directly.

In accordance with the NRC's "Rules of Practice" in Title 10 of the *Code of Federal Regulations* Section 2.390, a copy of this correspondence will be available electronically for public inspection in the NRC's Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC's website at <http://www.nrc.gov/reading-rm/adams.html>.

Please feel free to contact me if you have any questions. Thank you!
